IDEA GENERATOR

Pros

- Both experimental and non-experimental research have shown that violent video games damage young people playing them in both the short and long term, leading to criminal and anti-social behaviour.
- Parents are unaware of how violent the video games are. Parents often use video games as a way to keep their children entertained while they are busy minding their own business.
- Modern video games cannot be fairly compared to traditional childhood play.

Cons

- Many researchers (Ask, 1999; Funk, 1993, 1995; Provenzo, 1991) conclude that there is no causal link between violent video games and aggressive behaviour.
- Society has decided to embrace violent video games, which as a result are very profitable.
- Not only is it wrong for the government to take censorship-like steps against violent video games but it is also impossible to do so effectively.

See for example:

Person A: "In my opinion, I believe that Nintendo games make kids violent because of its warlike content that is why they should stop making those kinds of games from now on."

Person B: "I strongly disagree with the proposition since I believe that the warlike content of Nintendo games doesn't affect the behavior of kids."
